Medellín, Antioquia-Colombia

Results-driven Unity Game Developer with extensive experience building high-performance mobile titles and complex interactive UI/UX systems. Proven track record contributing to critically acclaimed projects like *FIFA Rivals*, successfully implementing core player economies, social features, and scalable telemetry architectures. Adept at combining clean code (C#) with data-driven optimization to drive user retention and commercial success in global markets.

WORK EXPERIENCE

Bacon Games (Project: FIFA Rivals) | Remote

Unity Developer | January 2025 - June 2026

- **Award-Winning Core Development:** Contributed to the frontend architecture of *FIFA Rivals*, crowned "Best Sports Game" at the [GAM3 Awards 2025](#) by an expert jury from Google, Ubisoft, and Sony.
- **Scale & Performance:** Maintained high performance and visual fidelity for a hit title reaching **1M+ downloads** with a sustained **4.6/4.7-star global app store rating**; featured as "Game of the Day" on the Apple App Store.
- **Economy & UI Systems:** Designed, implemented, and optimized scalable UI systems for the In-game Store, Item Inventory, and Marketplace, ensuring fluid player journeys and an intuitive user economy.
- **Telemetry & Analytics Integration:** Integrated advanced analytical and tracking tools (**Firestore**, **Singular**, **Snowplow**) to monitor real-time user behavior, directly influencing data-driven gameplay adjustments and player retention strategies.
- **Clean Architecture:** Applied architectural patterns and dependency injection to ensure highly maintainable, decoupled, and testable code across feature modules.

Rough House Games | Remote

Unity Developer | November 2024 - February 2025

- **UI/UX Optimization:** Designed and integrated interactive user interfaces for mobile and web cross-platform experiences, significantly improving user flow and visual engagement.
- **Cross-Platform Scalability:** Leveraged C# and backend integrations to handle seamless UI state transitions and ensure modular code scalability.

Webhelp - Supercell, Medellín, Colombia

Bilingual Game Support Representative | March 2023 - September 2023

- **Technical Problem Solving:** Provided high-tier live technical and billing support via Helpshift for massive global titles including *Clash of Clans* and *Clash Royale*.
- **Performance Excellence:** Consistently achieved high Customer Satisfaction (**CSAT**) rates between **75% and 93%** while exceeding job performance KPIs by 95% and maintaining a 99% attendance record.

EDUCATION

- **Generation Colombia, Medellín, Colombia** | Unity Developer Bootcamp (February 2024 - May 2024).
- **EAFIT University, Medellín, Colombia** | Mechanical Engineering (March 2023).

SKILLS

- **Core Technologies:** Unity (2D/3D), C#, C, Python, AR (ARCore, ARFoundation, Vuforia), Blender.
- **Tools & Methodologies:** Git, Jira, Trello, Agile/Scrum, Slack.
- **Soft Skills:** Analytical thinking, problem-solving, attention to detail, strong written communication.
